Kelly,

I just tried calling you as we are working on our Draft report for the Verona site and I would like to check with you if we could send you our report on Monday.

Thank you,

Dominique

Hi Dominique,

Hope you are doing well! I was wondering what the status is of the review of the 2020 annual monitoring report from the PRPs? I'd just like to get an idea of timeline so I can set up a meeting with EGLE after receiving your review.

Thanks,

Kelly Poulos

Kelly,

Thank you for the warning regarding the review of the 2021 sampling plan. I will start working on it on Friday or Monday and have the required files.

My colleague was able to create an application that will allow us to evaluate changes in pumping with the current version of the KT3D\_H2O software, a functionality we were using at the Verona site in the past. We therefore have all the tools.

Sorry for the delayed response, I was away from the office for our long weekend, a week before Memorial Day, here in Canada.

Dominique

**Subject:** Verona Well Field - 2020 annual monitoring report review

Hi Dominique,

I'm still waiting for comments from EGLE on the PRP's 2020 Annual Monitoring Report - they've let me know that they won't have them ready for another couple of weeks. Please review the report without their comments since EPA will need to provide the PRPs with our approval of their 2021 sampling plan (Table 9 of the report) soon. If you need me to reshare the report or excel database or have any questions let me know.

Also, how has the effort been to bring the older version of the model used at Verona up to date?

Best,

Kelly Poulos
